Procurement for the Supply, Delivery, Installation, Commissioning, Testing, and Operational Demonstration of Electric Vehicle Charging Station (EVCS) - Fast/Rapid

1. BACKGROUND

In 2023, Bataan's Provincial Government launched the Green Mobility Program as part of Project TRANSFORM of the Department of Environment and Natural Resources (DENR) in the province. As part of this initiative, six electric vehicles (E-vehicles) were blessed and turned over to the [Metro Bataan Development Authority \(MBDA\)](#) and [Provincial Disaster Risk Reduction and Management Office \(PDRRMO\)](#). In furtherance of its commitment in promoting sustainable development and environmental protection, the Provincial Government of Bataan (PGB) aims to install a 80kW fast-charging station at the Bataan Tourism Center in Balanga. This initiative also supports the Electric Vehicle Industry Development Act (EVIDA), and the Green Energy Management Program (GEMP) of the National Government.

Currently, there are six electric vehicles acquired by the province for patrol services and the provision of services to the people. These vehicles include four (4) Volkswagen ID6 Cruzz Long Range Pro versions; and two (2) BYD Dolphin models. There are plans of procuring additional four (4) EVs for the Sangguniang Bayan Office and MBDA in May 2024.

The Bataan Provincial Government is currently using slow charging stations for their electric vehicle (EV) fleet, requiring a full night to charge each vehicle. Data indicates that EVs are more economical than traditional fuel-powered vehicles. However, for enhanced efficiency and time-saving, particularly for EVs deployed in patrol and emergency response roles throughout the province, there is a pressing need to upgrade to fast charging infrastructure.

The installation of a fast-charging station at the Bataan Tourism Center will address the range anxiety of EV users, and will promote the adoption of electric vehicles.

Bataan, as our industrial park host province, plays a crucial role in our current and future business operations. The cooperation of Bataan is essential not only for our existing business but also for the new and renewable energy resource development projects that PNOC will be embarking on in the province.

PNOC would like to showcase its commitment to corporate social responsibility by supporting the necessary infrastructure for these electric vehicles, including the charging equipment, infrastructure support, canopy, signage, cabling, and network connection.

2. OBJECTIVES

1. To support the adoption of electric vehicles in Bataan by providing an express charging infrastructure.
2. To reduce carbon emissions and improve air quality in the province.

3. To promote sustainable development and environmental stewardship in line with national and local government policies.
